

Dear Janet & Edward —

Well, its the story of the whole last 2 months — enclosed is a 2 pp letter that I can't print (pretty good letter too, with important stuff in it) (Printer is down — heat, no doubt... ~~killin'~~ my Amiga too)

So — I'm enclosing the disk for you to print out (it was created on an Amiga 500 on Wordperfect for Commodore's Amiga 500 — version # (4.1) — I hope with your connections in the computer world you can find someone who can print it (and give a copy to Christopher & Judy)

In any event — PLEASE get the disk back to me ASAP... I tried to copy it and couldn't — important works in progress on it. —

Disk is titled ⇒ let94 your letter is galore.1
hope your well and up for the boat trip described in galore.1

(maybe you can read the print-out!)
by holding it to a side-light... something I have lost so much computer data in the past 2 months @*!!x

All best
Janet
