

Janet - has small bottles - Jim

ACID RAIN TEST

Actually this is nothing more than a half dozen Ph paper test strips that are active for Ph between 4.0 and 9.0 plus (2) strips for ph 1.8 to 3.8. They are packaged in a folder rather like a giant matchbook along with a little booklet on acid rain. Of course the strips are fine for measuring the acidity of anything from your soil to lab solutions, provided they are in the range addressed. Nice stocking stuffer for the ecologically inclined.

89116 Acid Rain Test Kit \$4.75/each

BIOLOGICAL CULTURE KIT

Grow your own! Molds, bacteria, yeasts and similar fascinating things live on hair, under fingernails, in the dog's dish, in fact just

about everywhere. Culture your own specimens to examine under your microscope. Kit contains 2 pre-sterilized plastic petri dishes, each 3-1/2" dia. x 1/2" high with cover, agar powder for making the growing medium, and an inoculating loop for transferring cultures. Packaged with an instruction book which not only tells you how to prepare the medium, but gives ideas and directions for a number of science projects.

88064 Culture Kit \$6.50/each

SWEET LEARNING

Now you can perform your experiment and eat it too!

Grow your own crystals of rock candy in just seven days.

This kit contains 1 lb. 6 oz of raw ingredients (including natural and artificial flavoring and coloring), plus a

"seed" stick and a plastic jar in which to perform the experiment. Heat the

raw material in a sauce pan with water, pour

it in the jar with the seed stick, wait seven days during which you can watch the huge crystals grow and grow.

At the end, you have real rock candy crystals all ready to eat! Comes with an informative instruction booklet.

Lots of fun as it's longer on pleasure than science. We will choose your color for you.

88917 Candy Crystal Kit \$8.95/each

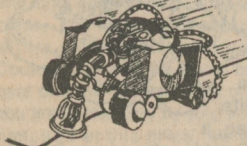

ROBOTS ON THE GO

Kits for the electronically inclined, aged 10 and up. (We emphasize the up.) Each produces a complete little robot, about 8" cube in overall size, give or take depending on the model. All move about under the builder's control. Each kit has all the parts and thorough, pretty intelligible instructions. You will need simple tools, such as screw driver, pliers, soldering gun, etc. The end products are all great fun as toys. And the satisfaction of having built it is an extra reward.

MEDUSA...

...is sound activated. Reacting to your voice commands she hobbles about on four legs and stops after a preset time. She is clear plastic so you can see her brain.

88688 Medusa Robot Kit \$44.95/each

LINE TRACKER...

...tracks a black line on white paper with the aid of an infrared sensitive photo interrupter.

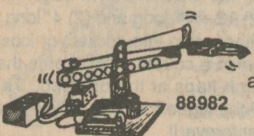

88740 Line Tracker Robot Kit \$69.95/each

MANTA...

...reverses for a preset time when it hears a loud sound like a clap and then resumes on a new course.

88981 Manta Robot Kit \$42.95/each

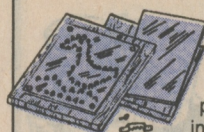

ROBOTIC ARM...

...kit teaches the basics of robotic arms. It pivots, lifts and lowers, and grabs and releases following simple commands. Food test of your own motor skills!

88982 Robotic Arm Kit \$69.95/each

SCIENCE & ELECTRONIC KITS

METAL PUNCH CRAFT

Kits to help the beginner learn the colonial craft of punching decorative holes in sheet metal panels. Originally used for ventilating things like bread tins, it evolved into a decorative craft in its own right.

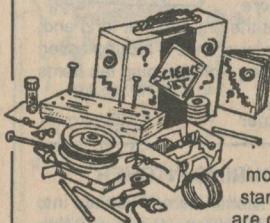

Kits include easy to follow full instructions, (3) patterns, pine backing panel, (1) aluminum sheet, and hanging hardware. The smaller kit has a 5" sq pine panel and 4" sq. metal sheet. Patterns are bear stein, swan and house. The larger has a 6" x 8" panel, 5" x 7" metal sheet, and locomotive, flower and Distelfink (bird on branch) patterns. You have to supply awl (or nail) and hammer to use the kits. Pretty good stuff at our price!

23731 Sm Metal Punch Kit \$1.00/each

23728 Lrg Metal Punch Kit \$1.75/each

\$2.50/each

ELECTRIC / MOTOR KITS

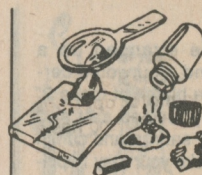

A pair of the best science education kits we have seen dealing with electricity, magnetism, motors and generators. For starters, the (smallish) boxes are crammed with essential, good quality components, not foam and air. The 44 page instruction booklets are educational, legible, and complete. They state the problem, the project approach with detailed steps, and explain what is happening for a series of projects of graded difficulty. The **Motor/Generator** kit includes several introductory experiments on magnetism as well as six complete motor generator projects leading to building a motor or generator. The **Electromagnet** kit includes introductory experiments and building an electromagnet, a doorbell chime, a telegraph, a relay and an electric catapult. Both are complete except for batteries. We strongly recommend these kits for the quality of their components (e.g.: neodymium magnets), the accuracy of their science and the interest they will sustain in the experimenter. Ages 10-18.

89338 Motor/Generator Kit \$22.95/each

89339 Electromagnet Kit \$22.95/each

THIS IS A MINERAL TEST

It is only a test. Had this been an actual mineral identification emergency, you would be helpless. The "Bit of U.S.A.

Basic Mineral Testing Kit" will hone your process of elimination skills to the degree needed to succeed in today's rock hard world of modern mineralogy. Quartz, Muscovite mica, Satin spar gypsum and (5) additional sample minerals are included in your (8) pc. specimen set. Learn the Moh Hardness Scale, specific gravities, streaking, glass hardness and many other properties discussed in the "Fundamentals" study sheet. Magnifier, magnet, streak & glass plates, acid bottle and more in a pocket-sized field box.

89628 Mineral Test Kit \$7.95/each

STEREOPTICON KIT

Remember the stereopticon in Grandma's attic?

That device that

held double pictures of strange

lands and produced

3-D images when

seen through the viewer?

Now you can make your

own 3-D pictures with the aid

of this simple kit. You have to buy

the disposable cameras to take the pictures, though.

What you get in the kit is a camera mount for taking

pictures, a viewer and easy to use instructions. Great

for ages 10 and up. A good way to learn a little simple

physics of parallax, optics and photography. And a

fun way to make a record of the growing kids.

89627 Kit, 3-D Photo \$25.95/each

AND CAMERAS

Purely as a convenience we offer the following disposable camera suggested

by the stereopticon kit. They are the identical Kodak™ Fun Saver 35, 15 exposure camera

with Kodak™ Gold Ultra 400 Film that you can find in any camera store and many drug stores. Check

prices, they may be better elsewhere.

89633 Disposable Camera \$17.95/pkg(2)

PATRIOTIC CHEMISTRY

Science kit, somewhere on the line between chemistry and magic. It consists of (3) crystalline compounds and (2) solutions as well as (4) cups for mixing and a complete set of instructions/explanations.

Make the clear solutions turn red white or blue, and then turn clear again. It is an exercise in simple reversible chemical reactions which will entrance the

beginner (age 9 and up), and could be the hook to stimulate further interest. It is safe stuff, but please

use normal caution and adult supervision.

88954 Patriotic Chemistry Kit \$6.95/each

\$5.00/each

BANDY BALL

Simple kit consisting of a super ball,

(100) rubber bands and an instruction

sheet. They idea is to put the

rubber bands on the super ball to

build a bigger ball. Now we know

that sounds stupid, but it is actually

quite hard to get a reasonably round final

shape (if that is your object) and in any case, your ball

will be very lively and a bit eccentric in its bouncy

ways. We really think you will enjoy this toy!

89601 Bandy Ball \$3.50/each

BOTTLES, BOXES & BAGS

S.O.S.

If you were stranded on a desert island, you would certainly want a bunch of these 2" bottles for your sea salt and pepper corns, saffron and cumin seed, etc... to make your stay happy gourmet. Translucent polyethylene bottles with cardboard-seal black plastic caps. Opening is $\frac{3}{16}$ " ID. Bottle is $\frac{3}{4}$ " dia x 2- $\frac{1}{16}$ " OA. Perfect for the last thing you would want to be without. (Little things.)

24831 Plastic Bottle, $\frac{1}{4}$ oz. \$2.25/pkg (15)

UN-JOLLY GIANT JAR

At the risk of being indiscrete we would suggest that only the Jolly Green Giant would need a specimen container of this size: 400 ml with 50 ml graduations. It is translucent white plastic with a yellow screw top. That's about ice cream type pint size: 3- $\frac{3}{4}$ " dia x 4- $\frac{3}{8}$ " tall. But if the JGG needed this, he wouldn't be Jolly would he?? If you are of more average proportions, you will find it ideal for food storage, as in refrigerator dish.

23846 Pint Specimen Cont. \$1.25/pkg (4) \$2.00/pkg (4)

PLAIN JANE

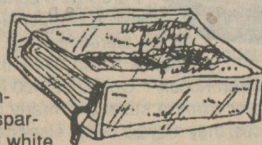

Semi-translucent white plastic bottle, 3- $\frac{7}{8}$ " dia x 6- $\frac{1}{2}$ " tall with a 32 oz capacity. It has a 1- $\frac{11}{16}$ " dia opening with a white plastic screw cap. Wash off the tempera paint label if it has one and fill it with lemonade for the picnic, or dry pigments for the home shop.

24228 Plastic Bottle, 32 oz. \$2.00/pkg (4)

ZIPPERED BLANKET BAGS

Basic vinyl bags from the retail blanket sales biz, transparent, gusseted with white seams. Ad print is all over them. No doubt they will be perfect for putting up the winter stuffs while keeping that fresh winter... smell. Well they won't smell like the attic anyway. Plastic is sturdy 4 mil. Protect heirlooms, records, linens and all your fine washables.

Stock #	Size	Price
24691	15" x 18" x 3"	\$2.00/pkg (4)
24685	15" x 18" x 4"	\$2.25/pkg (3)
24688	15" x 18" x 5"	\$2.25/pkg (3)
24712	15" x 18" x 6- $\frac{1}{2}$ "	\$2.00/pkg (2)

DESIGNER SISAL

Real 28" x 38" bags originally used to ship coffee beans to the USA. Labeled with their exotic countries of origin. Like Ecuador, Tanzania, Brazil, Mexico and, yes, Columbia. Most have stenciled labels not only in black, but in red, orange, green or blue which discuss such matters as weight, bean type, and brand. But all do not. Sisal is the usual coarse, sturdy brown stuff we all know so well. Excellent for lugging things around, three legged

aces, or yuppie designer wall coverings.

20376 Coffee Bag, Sisal \$2.25/each

STOP THAT BOTTLE!!

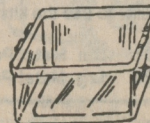

A marvelous assortment of real corks for every occasion! All are tapered with the smallest $\frac{1}{2}$ " dia at the bottom, $\frac{5}{8}$ " dia at the top x $\frac{13}{16}$ " long. The largest is 1- $\frac{5}{16}$ " dia at the bottom, 1- $\frac{5}{8}$ " dia at the top x 1- $\frac{1}{2}$ " long. Seal labwear, kitchen bottles, sinks, holes in the boat! Make fishing floats, bathtub boats and Xmas decorations. You can't have too many corks. Particularly at our prices!!

23829 Cork Ass't \$3.75/pkg (25)

RECTANGULAR BOWL

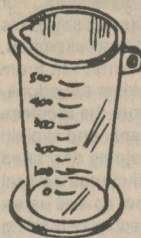

A box/pan container made of transparent plastic. It is 4" high x 7- $\frac{1}{2}$ " long x 5- $\frac{1}{2}$ " wide and has a $\frac{1}{2}$ " raised band around the rim. There are (2) $\frac{1}{2}$ " x $\frac{3}{16}$ " tabs at the rim of either long end, leading us to believe there was once a locking cover. Versatile enough for anything from keeping lab items on ice to feeding the dog.

24019 Plastic Container \$2.25/pkg (3)

MEASURING PITCHER

Super kitchen item, if you are into metric cooking. If not use this translucent blue plastic pitcher in the lab. It is about 3" dia x 6- $\frac{1}{2}$ " tall, tapering outward slightly from flanged base to top. It has a pouring spout, but no handle, only a tab with a hole in it suitable for hanging. Graduated in 50 ml increments to 500 ml. You could

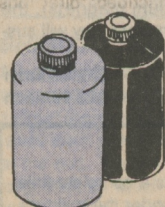

scale it in English measure if you need. Good quality durable item.

23306 Pitcher, 500 ml Grad. \$2.50/pkg (2)

STORAGE BOTTLES

1000 ML HDPE plastic bottles, 3- $\frac{3}{4}$ " dia x 8" tall. These are grim, with narrow (1- $\frac{3}{16}$ " ID) mouths and white polypropylene screw tops. One is pigmented amber to protect light sensitive chemicals, the other is milky white and translucent. Both are very resilient, top quality from

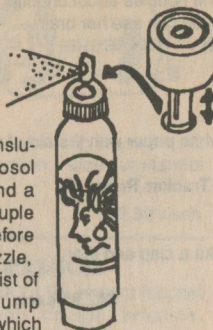

Azlon in the U.K. Great for storing solid chemicals, supplies and hobby materials.

21534 Amber 1000 ML NM \$1.00/each
21594 White 1000 ML NM \$1.50/pkg (2)

MISTER MISTER

And Ms mister. And anything else mister. The perfect gift for the perfectly lazy environmentally concerned. It is a non-aerosol aerosol spray. An empty translucent 8 oz bottle with an aerosol spray nozzle on the top and a built in pump cap. Take a couple of lazy strokes on the cap before removing it to expose the nozzle, then point and spray a fine mist of whatever wherever. The pump strokes put air in the bottle which produces the pressure for the spray to work. If you are too zoned out to finger pump the water spray on the beach, this is your answer!! Just pump up the pressure before you go. Comes with three nozzles of varying intensity, and may have labeling silk screened or pasted on its body. We love it!!

23878 Spray Pump Bottle \$2.00/each

CONTAINER

We would call it a margarine container, but our printer is in Wisconsin, and threatens not to print a page with that word in a headline. And in fairness it could have been intended to hold a dip or some such goody. It is in all respects standard, plastic, of 8 oz. size with a snap on lid. And it is cream colored. (Feel better now, Wisconsin-ites?)

22445 Plas. Container, 8 Oz. \$2.00/pkg (10)

JAR/CUP

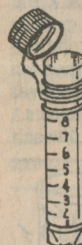

Translucent plastic specimen cup, made to take a screw cap, which we don't have. It is 4 oz., 120 ml capacity, graduated in $\frac{1}{4}$ oz and 10 ml increments. Great for mixing small amounts of stuff, and then disposing to save the trouble of cleaning up!!

22818 Plas. Specimen Cup \$2.00/pkg (20)
\$1.00/pkg (20)

NIFTY PLASTIC VIALS

8cc, clear plastic test tubes that have got it all! They have attached plastic screw on caps and a label patch on one side. Graduated every 1cc, the measurements are in relief which allows easy viewing inside and flattened outside for standing. Talk about user friendly science! Made as centrifuge tubes, but think of them as parts containers, sample holders, or

spice bottles for the gourmet camping trip!

24396 Centrifuge Tubes \$2.00/pkg (10)

FORTUNE BALL

Sort of. A clear plastic dome, 4- $\frac{1}{2}$ " dia x 3- $\frac{1}{2}$ " tall mounted on a 5- $\frac{1}{8}$ " dia x 1- $\frac{1}{2}$ " base. The base is either white or black plastic. The base has a removable bottom, and an interior "shelf" $\frac{1}{4}$ " below its upper rim, which serves as a "floor" for the dome. Except that the shelf only covers half of the base area, plus a 1" dia area around the center point. (See the drawing!!) The dome is removable, so the base geometry may be irrelevant. Use it to display a portrait miniature, precious mineral, or pet mouse (stuffed). Adapt it for a bi-level terrarium. Turn it into a meter housing. Fill it with fog, and hold a seance! Endless uses!!

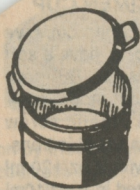

23697 Clear Plastic Dome \$2.00/each

AIR BAG

Yes, it is an automotive air bag. And let's be clear, you cannot and should not try to use this to build your own, or do anything to the existing air bags on your vehicle. You can use the .014" thick woven white nylon bag as a sail bag, a storage bag for the inflatable raft and beach stuff, a cover for the barbecue or just as the source of some top grade nylon material to sew into something of your own design. As is, the bag is sort of duffel shaped, about 21" dia x 27" long with a 12- $\frac{1}{2}$ " x 4" rectangular opening positioned on the side of the bag. The opening is framed by (2) 12- $\frac{3}{4}$ " long and (2) 4" long x $\frac{3}{4}$ " wide steel strips either sewn into pockets or loose in the bag. There are also a couple of 31" cords that can be threaded through flaps at the opening. The material is obviously of the highest quality so you may expect this dude to wear forever!!

23735 Air Bag \$4.50/each

RED FILM CAN

It looks kind of like a red plastic container for film. But the film would have to be 50 mm and unaffected by light! About 2" dia x 2" tall with the snap on lid hinged to the base, it is opaque but some light gets in. A truly fine general duty container with 3 oz capacity.

22813 Red Plastic Container \$2.00/pkg(8)

PIXIE MILK CANS

Clear glass 3 ml serum bottles, 17 mm dia x 38 mm tall. The necks and openings resemble those of a milk can, but the opening is only 7 mm ID. Great for holding tiny parts, modeling paint leftovers, or colored sand and water. You need a #00 cork for closure. (Our #88746 @ \$2.00/pkg(25) will do.)

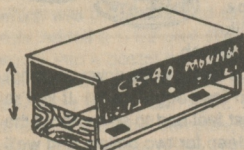

24476 Serum Bottle, 3 ml \$2.00/pkg(20)

PRETTY AMBER

Superb big amber serum bottle, 37 mm dia x 78 mm tall with a 30 ml capacity. It is heavy glass with rounded shoulders and (2) reinforcing lugs where long neck joins the body. The 14 mm ID opening cries out for a single flower bud!! Sorry, we don't have a cap, but try using a #5 cork if you need a closure.

23469 Amber Glass Bottle, 30 ml \$2.00/pkg(5)

ALUMINUM PROJECT BOX

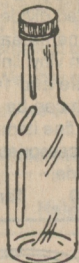

Two-piece anodized aluminum project box that measures 1-3/16" x 3-1/8" x 5" when assembled. As

designed, the top has a burl woodgrain finish over the aluminum. It also has two 1/2" x 9/32" rectangular holes that look to have been for slide switches and a 1/2" diameter line cord hole in the center of one end. The other half of the box is black anodized aluminum free of any perforations. If you can use the holes, super. If not, turn the thing over, redefine the bottom as top, and put rubber feet over the holes in the new bottom!! We're providing the four screws for assembly with one tiny catch. The first time you insert them, the initial turning is a little tough, as they're self-tapping. After that, it's smoothturning for the old project box!!

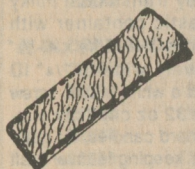

6351 Alum. Proj. Box, 2-Pc \$1.50/each
(10) or more \$1.25/each

PAUL NEWMAN'S?

Handsome 2-3/8" dia x 9-1/2" tall glass bottle of salad dressing stature (12.7 oz). It has a sloped shoulder and long, tapered neck. The glass is clear. The opening is approx. 3/4" with a yellow plastic screw cap. Could serve well for home brewed beer or wine, flavored olive oils, etc. You are limited only by your imagination, and at this price, we expect imaginations to run wild.

24552 Glass Bottle, 12.7 oz \$2.25/pkg (3)

COMB CASE?

Flat imitation leather case, 1-3/4" x 7", just the right size to carry that fancy silver comb! Or a fancy pen and pencil, or a small test gauge or tool. A proper sheath for anything that shouldn't be exposed.

23034 Im. Leather Sheath \$2.00/pkg(5)

\$1.00/pkg (5)

BOTTLES, BOXES & BAGS

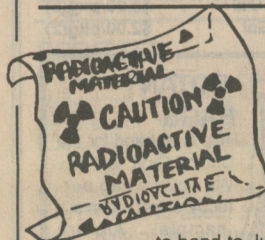

MEDIUM PLASTIC BAG

We see it being used to store out of season clothing, shoes for the truly big of foot, and other storage items which would benefit from the heavy 4 mil thickness and high degree of transparency. But there is no reason why it couldn't be used to pack wet swim suits on the last day of vacation, or transport leftovers away from the picnic site. Provided, of course, that

you want to see in-transit picnic leftovers, and that they require an 18" x 24" (flat) container.

22235 Plastic Bag, 18" x 24" \$2.00/pkg(6)

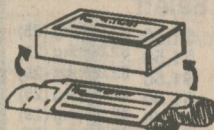

RADIOACTIVE WASTE BAG

Handsome yellow 4 mil plastic bag, about 18" x 25" on which is repeatedly printed (in bold red lettering) "CAUTION radioactive waste".

Sounds like just the item to hand to Junior when you tell him he positively, absolutely must clean his room!! We believe they were manufactured to receive the non-radioactive stuff that the regs now require be called radioactive: like X-ray technician's lab gloves. But we don't really know. We just think they are attractive and useful. But be careful not to violate any regs on waste disposal!

23329 Radioactive Waste Bag \$2.00/pkg(4)

MINI

PRESCRIPTION BOX

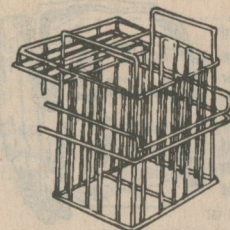

Just what the doctor ordered. A little (1" x 1-7/8" x 1/2") cardboard box inscribed: "directions, take: ____ Keep out of reach of children." Could hold a swallow of frog's tongues, a blink of newt's eyes, a chirp of whole crickets or a single flap of bat's wings. You be the doctor and decide.

22539 Prescrip. Box \$2.50/pkg (100) \$3.75/pkg(100)

STRIP CAN

Got your attention, did we? Remember those little plastic cans with attached lids? They contained filmstrips which were so boring, it caused revision of the entire world of multimedia. 2" dia x 1-1/2" tall black plastic with a hinged snap closed lid, as befits a film container. Good for storing small parts, watch batteries and anything light sensitive.

23187 Flip Top Vial \$2.00/pkg (8)

COFFEE TEA OR ??

Black vinyl coated wire basket made to hang on the end of an airline beverage cart. The main basket is about 7" x 12" x 7-1/2" deep, with the 12" dimension divided into 7-1/2" and 4-1/2" sections. Along one long edge there is a 3+ shelf at the top, along the other an "L" hanging rod and at the ends two loops for handles. Looks like a great basket to lower glassware or parts into a vat of hot water or cloth into dye, or beer into a cold river. Or use it to tart up the beverage cart on your airplane!

22758 Coated Wire Basket \$3.75/each

BOTTLE STOPPERS

For pop, beer or suitably sized lab bottles. A lever top expands the lower rubber seal and keeps fizziness in, staleness out. Fits and seals between 5/8" and 3/4" openings. Plastic and rubber; may be red or white; chromed steel lever; 1-1/2" long. For cultural reference,

we think they were popular in the 1960's and early 70's.

24750 Bottle Stoppers \$2.50/pkg (12)

SQUARE AMBER

Amber glass 4 oz bottle, 1-3/4" sq x 4-1/4" tall with a white plastic safety screw top. Good all around bottle for light sensitive stuff.

23713 Amber Bottle, 4 Oz. \$2.00/pkg(4)

CLEAR 10 DRAM VIAL

Which says it all except that it is hard plastic with a white push-in stopper cap. 1-1/16" dia x 3-1/2" tall OA.

23288 Plastic 10 Dram Vial \$2.50/pkg(12)

15 CLEAR DRAMS

Clear plastic vials with white snap tops and a capacity of 15 drams. 1-7/16" dia x 2-1/2" tall. They have some sort of insert in them which you will just want to pull out and throw away.

23907 Vial, 15 Dr. \$2.00/pkg(10)

RED JELLY JARS?

Well the plastic screw caps are red anyway; the glass is clear. At 2-3/8" dia x 4-3/8" tall, they are perfectly sized for every 8 oz use you can think of. The opening is a full 2" dia and comes topped with a red plastic lid. Don't underestimate the holding power of these attractive and utilitarian vessels. Foods, hardware, notions, marble collections.

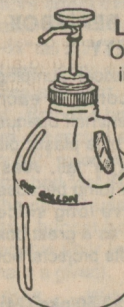

24549 Glass Jars, 8 oz \$2.00/pkg (4)

CAUTION BAG

3 mil plastic bag, lovingly rendered in electric yellow with black imprinting proclaiming "Caution Chemical Hazard". The bag is 24" wide x 36" deep, flat. Great for disposing of chemical wastes or the household stuff you can hardly bear to handle. But remember you can get in trouble for improperly disposing of wastes!

23798 Yellow Plastic Bag \$1.00/pkg (4) \$2.00/pkg(4)

LIZ TAYLOR LOTION BOTTLE

One gallon bottle of the sort that many industrial liquids come in: 6" dia x 12" tall with a tapered top and integral handle. The 1-1/4" dia opening has a pump dispenser similar to that of a hand lotion bottle, but quite large. The sort of thing we can imagine Ms Taylor taking poolside to refresh her tanning lotion after a dip. Remarkable!

23732 Gal Bottle w/Pump \$2.00/pkg(2)

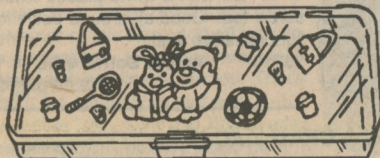

BOTTLES, BOXES & BAGS

BAGS

Transparent, 3 mil thick, plastic bags with heat sealed sides and bottoms. Vert tough. Made from a plastic laminate. Good for artwork, archives and articles of clothing and everything else from a - z. Three sizes and quantities. The first measurement is width, the second length. Check 'em out!

24672	12" x 30"	\$2.00/pkg (12)
24675	16" x 24"	\$2.00/pkg (10)
24678	18" x 24"	\$2.00/pkg (8)

CUTESY PENCIL BOX

Translucent light yellow or pink plastic box for school kids to carry pencils and similar supplies. 2-3/8" x 7-3/8" x 1" it has a hinged snap fastening lid and is decorated with little soccer balls, shuttle cocks, stuffed animals and the like. Cute, but still useful.

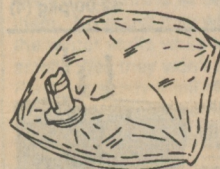

24317	Plastic Pencil Box	\$2.00/pkg(4)
-------	--------------------	---------------

GENIE BOTTLE

one of the cutest little bottles we have had for ages. Rub it and a genie will appear!! Or if you don't believe that, use it for a bud vase, as the base for a doll house lamp, or (upside down) as the smoke stack for a glass steam engine model!! 29mm Dia x 67 mm tall OA, it has a 12 mm opening (takes a #3 cork). Check out the drawing. It necks down to 14 mm dia for about 7 mm, 32 mm from the base, then flares out to 24 mm dia for 10 mm then back down to the final 15 mm OD neck. And it is amber glass!! This one is really special!!

23126	Amber 20 ml Bottle	\$2.00/pkg(8)
-------	--------------------	---------------

WATER PILLOWS

One and two gallon plastic bags, made by laminating flat double sheets of translucent plastic together at the edges. The outer sheets are 4 mil and the inner are 2 mil. The result is sort of pillow shaped with a large blue plastic valve one side, near a corner. The one gallon item is 13" x 15", the two gallon is 16" x 18". Each can be rolled for storage, and of course can be inflated with air or anything else you like.

22868	Plastic Bag, 1-Gal.	\$2.00/pkg(4)
22871	Plastic Bag, 2-Gal.	\$2.25/pkg(3)

DEAD BEAN BOX SOCIETY

x24! Three Mexican Jumping Beans come in each classic half transparent/half opaque red, green, yellow or blue plastic pill box, 1-1/8" square x 3/8" tall. Alas, the beans no longer jump because their caterpillar tenants have long since passed on. So cash in on this offering as a great box deal and use the beans in arts and crafts projects, not your soup.

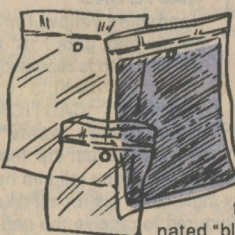

24818	Plastic boxes, 1-1/8" sq	\$2.50/pkg (24)
-------	--------------------------	-----------------

WIDE MOUTH BEAUTIES

Wonderful big dry storage jars, opaque white plastic with cream plastic screw lids. The one gallon size is 6" dia x 9-3/4" tall while the half gallon size is 5" dia x 7" tall. Both have a 4" plus ID opening. We see them holding flour and sugar and tea and such, but of course they will be fine for lab chemicals, lemonade or carrying goldfish on vacation. Beware! The lid fit is ok, but not great for the 1/2 gal size and will not give an air/water tight seal.

24234	Plas. Bottle, 1/2 Gal	\$2.00/pkg(3)
24231	Plas. Bottle, 1 Gal	\$2.00/pkg(2)

BOTANY BAGS

Help is at hand for the Botany Girls field trip. We have a bag perfectly sized for every sample. All are heavy duty ziplock type plastic. If designated "blue" it means that one side is opaque blue, but the other is clear. They have been around a bit and should not be used for food. They also are hole punched below the "zip" in the center top of each bag. The larger dimension in all cases is height in inches. Blue bags are 6 mil, clear are 4 mil.

BLUE BAGS

23931	Bag, 3x3	\$1.50	\$2.00/pkg (25)
24059	Bag, 3x6	\$1.50	\$2.00/pkg (25)
23435	Bag, 4x4	\$1.50	\$2.00/pkg (25)
23943	Bag, 4x6	\$1.50	\$2.00/pkg (25)
24051	Bag, 4x7	\$1.75	\$2.50/pkg (25)

BACKPACK

Bright yellow nylon pack with a big zipper pouch on the face and optional shoulder strap (adjustable to 3 ft). It has the traditional zipper top, adjustable straps and hand loop. The main pouch is about 17" x 12" x 5". Ideal for books and folders, cats or tools. The 8" x 10" side pouch is good for flash cards and yellow pencil boxes, cat food or hardware. The shoulder strap clips to two "D" rings on the sides. School, picnics with your pet and do-it-yourself work are easy and fun with this great item. And at a great price too!

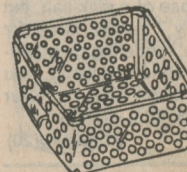

24665	Yellow Backpack	\$5.00/each
-------	-----------------	-------------

LIDDED SPECIMEN CUP

Most of the specimen cups we get are open top, or have a sort of dixie cup closure. But now, enter the high cost model complete with blue plastic screw cap!! The cup as usual is transparent plastic, with 4 oz/120 ml capacity, graduated in 1/4oz/10ml increments. Nice refrigerator dish for individual leftovers, picnic stuff holder, or even specimen holder for the biology project (field samples, of course).

23315	Specimen Cup w/ Cap	\$3.00/pkg(10)
-------	---------------------	----------------

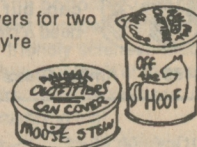

FRY BASKET?

Back when people had greasy things like french fries, they dipped the goodies into the fat in a steel basket. Well, we have a little plated steel basket, 4-3/8" x 6-3/8" x 3" deep, whose sides are absolutely perforated with 1/4" dia holes, and whose end has a bracket inside and out to receive a handle, and to hank on the edge of the vat to drain the excess fat. Good for dyeing, draining, frying, straining and, yes, dipping!!

23090	Plated Steel Basket	\$1.00/pkg (2)	\$2.00/pkg (2)
-------	---------------------	----------------	----------------

HOW BIG IS YOUR CAT?

We've got pet food can covers for two standard entrée sizes. They're from Animal Outfitters™ and fit the cans pet lovers are so familiar with; 3-1/2" for 8 & 32 oz, or 3" for 16 oz. Made of tough, tupper-like plastic with a convenient pull tab on one side. If your favorite beast wolfs down an entire can every time, use them for people cans! If you're foiled by plastic wrap or just feel bad to spike about the crunchies at the rim, dig deep for two dollars and we'll send you a slew of really useful container tops.

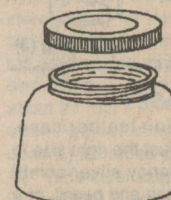

24624	Pet Can Cover, lg	\$2.00/pkg (12)
24621	Pet Can Cover, sm	\$2.00/pkg (20)

CAMERA CASES

That will be just great for the new, small camcorders too! Tan, 12" x 9-1/2" x 6-1/2". It is split by a padded divider with a pocket in it, into two equal compartments each 12" x 9-1/2" x 3". Canvas, it has a brown vinyl lining and trim and a brown nylon webbing handle and 1-1/2" x 4 ft adjustable shoulder strap, which can be attached with (2) snaps and "D" rings. Truly fine items made for carrying computer terminals or accessories, they have Texas Instruments name on the side.

24100	Tan Carry Case	\$9.50/each
-------	----------------	-------------

POT

Or jar. But clearly of more unusual shape than a mere bottle. Barely translucent milky white plastic container with bulging sides 4-3/4" dia x 4-1/4" tall, a lovely wide 3-1/4" ID mouth and a white plastic screw cap. The 32 oz capacity suggests use for storing homemade hard candies, for gathering pond water samples, or for keeping leftover craft project supplies.

24237	Plas Bottle, 32 oz	\$2.00/pkg(4)
-------	--------------------	---------------

COOL CANISTER

Low canister, nearly 3" dia but only 7/8" tall. It is steel, with a white enamel exterior (which may have a few tiny scratches). The lid is domed and fits on by friction. Looks like it should have some kind of cosmetic lotion or cream in it. Would be a good container for two large oatmeal cookies, a miscellany of bijoux, or a half set of false teeth.

22364 Steel Canister \$1.50/pkg (8) \$2.00/pkg (8)

DIXIE CUP

Or so we used to call them. Sweetheart Image #S335 is a 3.5 oz. waxed paper cup, 3" OD at the top, 2-1/2" ID at the bottom x 2" high. It has a white plastic lid. Oh, and it has brown and orange plants (side view) printed on it. Like looking sideways through a weed patch. Pretty romantic! Great for lunch box and individual picnic potato salads.

22368 Paper Cup, 3.5 Oz \$3.00/pkg (50)

FILM MAILERS

Back in the old days, you mailed your roll of exposed film to the processor for development. To do this you used a little 1-1/2" dia x 4" cloth bag into which you placed the film and money!! You secured these with a draw string, filled out the return address on the 1-3/4" x 4" label, which was pre-addressed to a processor on the other side, added a 1-1/2 cent stamp and dropped the whole works into a postal box!!! Boy, have times changed!! We have a bunch of these mailers, which are collectors items in their own right. But see them being used to collect and label samples, holding either the sample itself, or a storage bottle. Small parts, hardware, and similar miscellany will also fit. We suggest you not try mailing film, though!!

21551 Cloth Bag, w/ Tag \$2.00/pkg (50)

BOTTLES, BOXES & BAGS

SURGICAL WRAPPER

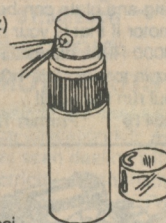

Very heavy natural cotton muslin that started life as a 12" x 25" flat piece. The ends were folded more or less to the center, and all edges were nicely seamed. The result is a double pouch opening at the center. You and the Surgeon General are at liberty to put tools, instruments, art plates or whatever else in there for storage, for sterilization, for transportation, or for the heck of it. Fold one backwards over a belt as a terrific flea market money apron. Sports the U.S. Medical Corps insignia, if that adds any authenticity to your new application. Brand new and in brand new condition.

3893 Surgical Wrapper \$1.00/pkg (2) \$2.00/pkg (2)

SPRITZER

Environmentally friendly little (1 oz) spray pump bottle. The bottle is translucent white plastic, 1-3/16" dia x 4" tall. It has a screw on cap with a finger pump sprayer that delivers a fine mist up to about 3 feet away. Kind of like an atomizer. A clear plastic cap slips over the pump to keep it from going off accidentally. Good for cologne, water cooling the brow in hot meetings, or adding vermouth to martinis.

22690 Spray Pump Bottle \$2.00/pkg (4)

8 OZ BASIC BOTTLE

White semi-translucent plastic bottle, 2-1/2" dia x 4" tall with a white plastic screw cap on the 1-11/16" dia opening. About as basic as they come.

24222 Plastic Bottle, 8 oz. \$2.00/pkg (8)

FOUR DAY WEEK

If this were a pill box, a four day supply is all it would hold. Orange, semi-rigid plastic, 4-1/2" wide x 2-3/4" deep x 1-1/4" tall box with (4) compartments, each 2-1/8" x 1-1/4". The outer surface is textured and the lid is hinged with snap fastening. Already grooving on cool things to put in here? Or, is your four day medicine so strong that you're asleep for the other three? Give two of these a shot for our everyday surplus price.

24126 Orange Plastic Box \$2.00/pkg (2)

SPECIMEN BOX

Short, clear plastic cylindrical box of petri dish likeness, but more versatile and pocket sized. 2-1/2" dia x 1" high (with 1/4" tall, press fit lid). Sturdy enough for paper clip keeping, specimen showing or candy containing. Clean, smooth and pretty boxes for lab, lolling or luxury. You can't go wrong.

24833 Plastic Round Box \$2.00/pkg (12)

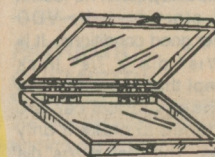

FABULOUS AMPULES

We normally do not get a fast heart beat over ampules, but these are beauties, principally because of the large, 50 ml size. They are crystal clear glass, 29 mm dia x 115 mm tall to the shoulder (175 mm OA). The necks are the usual graceful inverted tulip shape, with a narrow gold/yellow band at the wide point and then tapering to the 7 mm mouth. Great bud vases, cruets, sand sculptures, or just as is decorative items.

22919 Glass Ampule, 50 ml \$1.00/pkg (4) \$2.00/pkg (4)

Ditto for the 30ml version which is 25mm dia x 90mm to the shoulder, 160mm long OA. It has a 8mm opening w/gold band.

23590 Glass Ampule, 30 ml \$1.00/pkg (5) \$2.00/pkg (5)

CLEAR SAVER

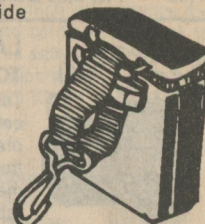

Hard plastic box, 6-1/4" x 4-1/4" x 3/4" deep. It is clear as newly washed window, hinged on one of the long edges, and has a snap closure. Great for saving flat stuff that you want to view, like baseball cards.

23166 Clear Hinged Box \$2.00/pkg (4)

WATERPROOF PLASTIC BOX

The instructions on the side show that, at one time, it held a military training - nerve agent decontamination kit. Part #M58A1 4-1/4" tall x 3" x 2", black plastic, it has a rounded base and tight, snap on lid. Both the box and lid are connected at the back by a 2" nylon web loop with attached 3/16" ID steel snap clip. The perfect use for this very strong, very waterproof little bucket box is up to you to define, and us to receive your letters on (but don't say First Aid Kit, that's a given).

25105 Waterproof Plastic Box \$2.00/pkg (2)

BOTTLEMANIA

Zillions of little bottles. Renegades from a pharmaceutical company, leftover unfilled from runs of exotic we-know-not-what. We have divided them into two basic shapes: **A, Square Shoulder**, have a 16mm dia x 4mm long neck on top of a squarish shoulder, a 19mm dia x 3mm rim and a 12 or 13mm dia opening; **B, Sloped Shoulder**, have roughly 56mm long neck that tapers from the soft shoulder down to 15mm dia, with a 19mm dia x 3mm rim and a 12-13mm dia opening. Height refers to height overall, and dia to the body dia in the table below. Great items for the doll house (for kids old enough not to swallow them), to hold tiny wild flowers, for decorative art work, individual cruets, or just to hold and marvel at. All quite sturdy glass. In the real world, you would pay from \$75 (smallest) to \$225 (biggest) for 288 of these, which is the smallest quantity you could get!!

All bottles in this listing take a #3 cork; We offer our surplus value: 88748 Cork, #3 \$2.00/pkg (20).

For those who can't make up their minds we offer an assortment of (10) bottles, with at least (5) different ones from the table below.

24449 Bottle Assortment \$2.00/pkg (10)

Stock No.	Cap	Dia	Height	Color	Price/Pkg	Price/Pkg

24329	20ml	32mm	59mm	Clear	\$2.00/pkg (10)	\$18.90/pkg (126)

DC MOTORS

TOWEL DISPENSER??

That's what this 6 VDC, 2 rpm, reversible gear motor looks like! It has a cardboard tube to hold (4) "D" cells in series, controlled by a mini slide switch on the end of a 50" lead. The motor and gear box together are a 1-3/4" dia x 3-3/4" black plastic unit with a 1/4" x 1-5/8" long output shaft. The whole arrives with a metal mounting bracket attached to the shaft via a collar and set screw and (2) mounting ears with brass grommets at the mid point of the motor/gear box. Affix the motor by the latter and the load by the former, or loosen the set screw and attach you load any old way you please. Great item for displays and portable exhibits.

25250 Gear Motor w/Batt. Holder \$7.50/each

3850 RPM GLOBE

Not a speedy geography lesson, but a TRW Globe 24 VDC motor, #403A185. Permanent magnet, reversible type with sleeve bearing. Rated 5500 RPM @ 0.165 amp no load, and 3850 RPM @ 1.0 amp, 6 oz/in torque. Stall torque is 15 oz/in @ 3 amp, and the torque const. is 5.5 oz.in/amp. 1-1/2" dia x 2-5/8" long with a 3/32" dia x 5/6" flatted shaft. Face mounts with (4) tapped holes.

21643 Globe 24 VDC Motor \$5.00/each

MOTERING SMALL

Open frame rectangular DC motor 3/8" x 3/4" x 7/8" exclusive of the 1/6" dia. x 5/16" long shaft sporting a blue or white plastic gear. Bronze bushings and brass contact that are folded flat against the body of the motor. Quite well made to go into some sort of photographic device. We're guessing their nominal rating at 3 VDC, although they start at about 1-1/2 and really sing at 12 VDC. Nice and compact, but pretty gutsy. Add functions to space tight robots or drive to runtest racers.

4374 Mini Motors w/Gear \$2.00/pkg(6)

FLAT SIDED 12 VDC

Well, Okay. With no load it will start at 1-1/2 VDC under good conditions. It is 1-9/16" dia x 7/8" thick except that opposite sides of the cylindrical can are flattened to make it only 1-1/4" wide between those sides. The shaft is 1/16" dia x 3/8" long, and the case is part steel, part plastic. (2) leads complete the picture. Whirring along at 10,000 rpm @ 12 VDC on its little ball bearings it is a reversible joy to behold. Mabuchi FM-250W.

24445 Flat Side Motor, 12 VDC \$2.00/pkg(4)

LASER DISC PLAYER TO GO

Take-out motor and turntable center from a video laser disc player. The motor operates from 1/2 to 24 VDC and has a magnetic tachometer to facilitate precise speed control. It bears #4322 O/O 75565, but we know not from whom. The motor is 1-7/8" dia. x 2-1/16" long, and the turntable is 2-3/8" dia. with a 1-1/4" dia. x 3/16" thick raised magnetic center. Great item for a build your own laser disc player, or any other application when you want precise speed control.

20066 Laser Video Motor \$6.50/each \$12.50/each

HMMMMABUCHI

Sweet Mabuchi 1.5-9 VDC motors that hum along at 2650 RPM (no load) when fed nominal power of 6 VDC. 1-1/4" dia x 3/4" thick, (2) solder tabs for connection and #RF-500TN-12560. Pain

1/16" dia x 5/16" long shaft. Made in China and humming beautifully in the States!

23003 Motor, 6 VDC, w/o Gear \$2.00/pkg(2)

12 VDC

A reversible 12 VDC takeout motor. Ball bearing, with 1/8" dia x 11/16" long output shaft, and with an aluminum drive fitting and a plastic mounting plate attached. The fitting and plate can be easily removed, leaving a clean motor if that is your need. Pitman #8313C272 runs at 8000 RPM, draws 250 ma (no load), and develops 1.4 oz-in torque. It is 1-3/16" dia x 2-1/4". They look used, but run like new!!

20416 Pitman 12 VDC Motor \$4.50/each

BUILD YOUR OWN MOTOR

Motor armatures, dismantled, or never assembled into small DC can motors. 7/8"

dia, has (8) "fins" of stacked steel plates and is wound with copper magnet type wire which is hooked up to copper brushes. Armature and brushes are mounted on a 1/8" dia shaft, 1/4" long on the brush end and protruding with a doubleflatted end opposite. The Large one is 2-1/2" long overall, with 7/8" armature and 9/16" shaft. If you are in the motor business you may want to encase some in lucite as paperweights. Unwind them for the wire, sit them on your desk to play with, give them to an enemy as a useless gift. You decide.

21507 Large Armature \$1.00/pkg(4) \$2.00/pkg(4)

SHIGOTO DC

A beautiful find!! A 1-1/2 to 6 VDC motor with leads!! It is 15/16" dia x 1-5/32" long and has (2) 3" long leads each with a copper contact at the end. It has a 1/16" dia x 1/2" long shaft on which there is a 10-tooth nylon gear. Made by Shigoto Johnson of Hong Kong, and just the thing for those whose soldering skills are weak!!

22989 Motor w/Lds, 1/2-6 VDC \$2.00/pkg(4)

2.4 VDC MABUCHI

Mabuchi motor #RS-540R-2.4V. Reversible, it spins along at 19,000rpm drawing 2.5 amps of 2.4 VDC power. 1-3/8" dia x 2-1/4" long with a 1/8" dia x 1/2" long knurled shaft and (2) solder lugs for connection. Nice substantial motor in a steel case.

24029 Motor, 2.4 VDC \$2.50/each

MAJOR MABUCHI

3 to 30 VDC !! Permanent magnet motor with carbon brushes. Mabuchi #RS-3755-16115, with a 1-1/8" dia x 1-1/2" long body and a 3/32" dia x 1/2" long shaft. A real whizzer that handles higher voltages than most little can motors.

Get some while they last!

23082 Mabuchi Motor, 3-30 VDC \$2.00/pkg(2)

RECORDER DRIVER

A nifty little 12 volt DC motor in an electrical and sound insulated can. 3/32" diameter by 1/2" long shaft. Overall can dimensions are 1-1/2" dia by 1-7/8" long exclusive of the shaft. A capacitor on the side performs an unknown function, as the thing seems to run well enough independent of the side of the capacitor one selects. Reversible by reversing the polarity. Fine beginnings of a very quiet electric swizzle for the camper. The insulated can suggest a recorder drive motor, but building one of those from scratch is probably a bit ambitious.

3058 Drive Motor, 12 VDC \$1.00/pkg(2) \$1.50/pkg(2)

MOUNTED MINI

Miniature 1-1/2 VDC motor in a mighty mounting. The motor is 5/8" dia x 1" long and it is virtually encased in a strong mounting assembly with (2) 9/16" x 3/8" x 3/32" magnets on opposite sides. A 7" lead and a brass contact on the mounting bracket complete the picture. Can the motor be liberated from the mounting?? Are the magnets part of the motor?? We don't know, but we suspect the answers in order are "no" and "yes". As is, it is an unusually rugged guy for its size. Labeled, "No. 1, Tokyo, Japan."

22992 D.C. Motor 1-1/2 VDC \$2.00/pkg(4)

6 VDC REVERSIBLE

KTK #10 reversible DC motor that starts at about 1-1/2 volts and hums along happily at 7000 rpm with 6 VDC, its rating. 5/8" dia x 1" long with (2) 5/16" long x 7/16" sq "bumps" on opposing sides that hold the stator magnets. The output shaft is 1/16" dia x 1/2" long. (2) leads are solder on, but are fragile and could come off in shipping and handling. Good torque for a little guy. Kind of a diamond in the rough.

24448 Motor, 6 VDC \$2.00/pkg(2)

STEPPERS

8 VDC RAPID-SYN

Rapid-Syn Model 23PS-01B. 2-1/4" diameter with a 1/4" x 5/16" long shaft. Two coils each with three leads. Rated 28 volts DC.

3654 Rapid Stepper Motor, 28VDC \$1.00/each \$2.00/each

MOLON LMS

Clearly marked as a Molon LMS 3018 Stepper, but that's about all. 2-1/4" dia. with 1/4" dia. x 5/16" long shaft. Two coils, each with three wires. Seemed to work real well at six volts DC.

3668 Stepper Motor, 6 VDC \$2.50/each \$5.25/each

MOLON MYSTERY

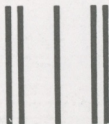

Molon #LMO-6360-1 stepping motor of unknown voltage. Each step is 18° (20/rev). 2-5/16" dia x 1-1/8" thick with a 1/4" dia x 1-1/8" shaft. There is an easily removed, complicated mounting/coupling assembly on some of the motors but not on others.

22940 Molon Stepper \$2.25/each \$5.00/each
